GAURAVJEET SINGH

Software Engineer | Full-Stack Development | Backend & Analytics Platforms

: +91 9872082415 | gau94rav@gmail.com | LinkedIn | GitHub

Offering 7+ years of experience in designing and developing production-grade web applications, backend services, REST APIs, analytics dashboards, reporting platforms, and data-driven applications. Strong expertise in Python, FastAPI, Django, Flask, Vue.js, JavaScript, TypeScript, PostgreSQL, Snowflake, Docker, and REST API development, with hands-on experience across backend engineering, frontend development, data platforms, and full-stack product development. At Snyk, contributed to security analytics and reporting products handling large volumes of vulnerability data, building APIs, dashboards, reporting capabilities, and export solutions. Proven ability to work across frontend, backend, and data engineering teams, solve complex technical problems, and take features from design through production release.

KEY SKILLS

Backend Engineering | Full-Stack Application Development | REST API Development | Analytics & Reporting Platforms | Data-Driven Application Development | Dashboard Development | Security Analytics | API & Database Design | Data Processing & Aggregation | Application Architecture | Production Application Development | Cross-Functional Collaboration | Technical Problem Solving | Agile Software Development | Code Review & Debugging | Technical Interviews & Engineer Onboarding

TECHNICAL SKILLS

Programming Languages: Python | JavaScript | TypeScript | PHP | SQL
Backend & Frameworks: FastAPI | Django | Flask | Node.js | SQLAlchemy
Frontend: Vue.js | React | HTML | CSS | Monaco Editor
Databases & Data Platforms: PostgreSQL | Snowflake | Redis
API & Architecture: REST APIs | Backend Services | API Integration | Database Design | Data Aggregation | Reporting & Export Systems
Cloud & DevOps: Docker | Containerized Applications
Asynchronous Processing: Celery
Development & Collaboration: Git | Agile | SDLC | Debugging | Code Review

PROFESSIONAL EXPERIENCE

SNYK | Software Engineer — Mar 2022 – Jun 2026

- Designed and developed **security analytics dashboards** enabling users to explore vulnerability and security data, including **issue summaries, issue details, CVE, CWE, and zero-day reporting**.
- Developed and maintained **Python-based backend services and REST APIs** supporting analytics, reporting, data retrieval, filtering, and customer-facing workflows.
- Built reporting capabilities integrating **Python services, Vue.js applications, Snowflake-backed datasets, and PostgreSQL** to deliver data-driven product features from concept through production release.
- Designed and delivered the backend for the **Reporting Export API**, enabling customers to efficiently export large volumes of security reporting data for analysis, compliance, and stakeholder sharing.
- Implemented data aggregation, filtering, reporting, and visualization capabilities to improve accessibility and usability of large security datasets.
- Collaborated across **frontend, backend, and data engineering teams** to define requirements, resolve technical challenges, and deliver production-ready features.
- Contributed to technical interviews and supported **onboarding of new engineers**, sharing product and technical knowledge across the engineering team.

TOPCOAT | Software Engineer — Oct 2021 – Mar 2022

- Designed and developed an interactive, browser-based **reporting IDE** using **Vue.js and Monaco Editor**, enabling customers to create customized analytics and reporting experiences.
- Built SQL and Vue integration capabilities that allowed users to develop custom reporting pages within the platform.
- Developed an intelligent **context-aware autocomplete system** providing relevant suggestions while users worked with SQL and Vue code.
- Enhanced reporting dashboards and analytics experiences powered by **Snowflake-backed data**, improving the flexibility of customer-facing reporting capabilities.
- Developed and enhanced **Python APIs** supporting reporting products and data-driven application workflows.
- Collaborated with product and engineering teams to translate reporting requirements into scalable production features.
- Contributed to the evolution of the reporting platform prior to its acquisition by **Snyk**.

CANVAS CRAFT MEDIA | Full Stack Developer — Mar 2019 – Oct 2021

- Designed and developed **10+ bespoke web applications** for international clients across e-commerce, data collection, media, automation, and business applications.

- Built and maintained **full-stack e-commerce websites and custom business applications**, delivering features across frontend and backend layers.
- Developed **Python-based web scraping and automation solutions** for data collection, processing, and workflow automation, reducing repetitive manual activities for client projects.
- Developed video hosting and media-related applications supporting varied client business requirements.
- Built an **Electron-based job/activity tracking application**, delivering functionality across the application stack.
- Worked directly with international clients to understand business requirements, evaluate technical approaches, and deliver tailored software solutions.
- Rapidly adopted new technologies and frameworks based on project requirements while consistently delivering production applications within client timelines.

INDEPENDENT LEARNING & FREELANCE DEVELOPMENT

Freelance Developer / Independent Software Development **2015 – 2019**

- Built responsive websites, landing pages, and custom web applications for local businesses and individual clients.
- Converted **Figma designs into production-ready frontend interfaces**, focusing on responsive layouts and user experience.
- Developed web solutions -**HTML, CSS, JavaScript, PHP, and Node.js** while continuously expanding full-stack development capabilities.
- Contributed to open-source projects and participated in coding camps and technical workshops organized by local colleges.
- Strengthened practical software engineering skills through continuous self-learning, freelance development, and hands-on project work.

PROJECT

SMART DASHBOARD | Independent Analytics Platform

- Designing and developing independent analytics **and reporting platform** using **FastAPI, PostgreSQL, Celery, and Docker**.
- Building capabilities for dashboarding, reporting, background processing, and data-driven application workflows.
- Applying production-oriented architecture principles to strengthen expertise in **scalable backend systems, data platforms, and AI-enabled applications**.

EDUCATION

- B.Sc. – Information Technology | Karnataka State Open University / NIIT | 2012 – 2015
